

Studebaker National Foundation Scholarship Recipient

First, I'd like to thank the Studebaker National Foundation and everyone who has made contributions for the scholarship. I will be attending the University of Findlay in Ohio this fall for pre-veterinary school and intend to double major in pre-veterinary animal sciences and biology before continuing on to vet school.

I've been around Studebakers since I was little. My mom owns a '60 Lark convertible that was her 16th birthday present, and I remember cherishing the days she picked up my brother and I from school in it, and we still take it out for drives whenever the weather allows. Car shows are a family tradition too - not just for my parents and brother and I, but for my grandparents, Jon and Betty Myer, too. After getting my driver's license, I've been allowed to take one of their cars to the Duncan Falls show every year, and I always choose the red '60 Lark convertible that matches my mom's. I fully intend to have at least one Studebaker of my own one day, and to continue attending shows when I can.
